

1 Non-dimensional Forms

The IAPWS-95 document possesses a table that summarizes the Helmholtz free energy function's relationships to a number of thermodynamic properties. These relationships, as programmed into the WP, are a bit different from those documented since constant, scalar non-dimensional properties are preferable and desired. The table below summarizes the relations from the IAPWS and those used in the WP.

Table 1:		
Property	IAPWS-95 Relation	WP Relation
Pressure	$\frac{P}{R\rho T} = 1 + \delta \frac{\partial \phi^r}{\partial \delta}$	$\frac{P}{R\rho_c T_c} = \left[1 + \delta \frac{\partial \phi^r}{\partial \delta} \right] \frac{\delta}{\tau}$
Internal Energy	$\frac{i}{RT} = \tau \frac{\partial \phi}{\partial \tau}$	$\frac{i}{RT_c} = \frac{\partial \phi}{\partial \tau}$
Entropy	$\frac{s}{R} = \tau \frac{\partial \phi}{\partial \tau} - \phi$	$\frac{s}{R} = \tau \frac{\partial \phi}{\partial \tau} - \phi$
Enthalpy	$\frac{h}{RT} = 1 + \tau \frac{\partial \phi}{\partial \tau} + \delta \frac{\partial \phi^r}{\partial \delta}$	$\frac{h}{RT_c} = \frac{1}{\tau} \left[1 + \tau \frac{\partial \phi}{\partial \tau} + \delta \frac{\partial \phi^r}{\partial \delta} \right]$
